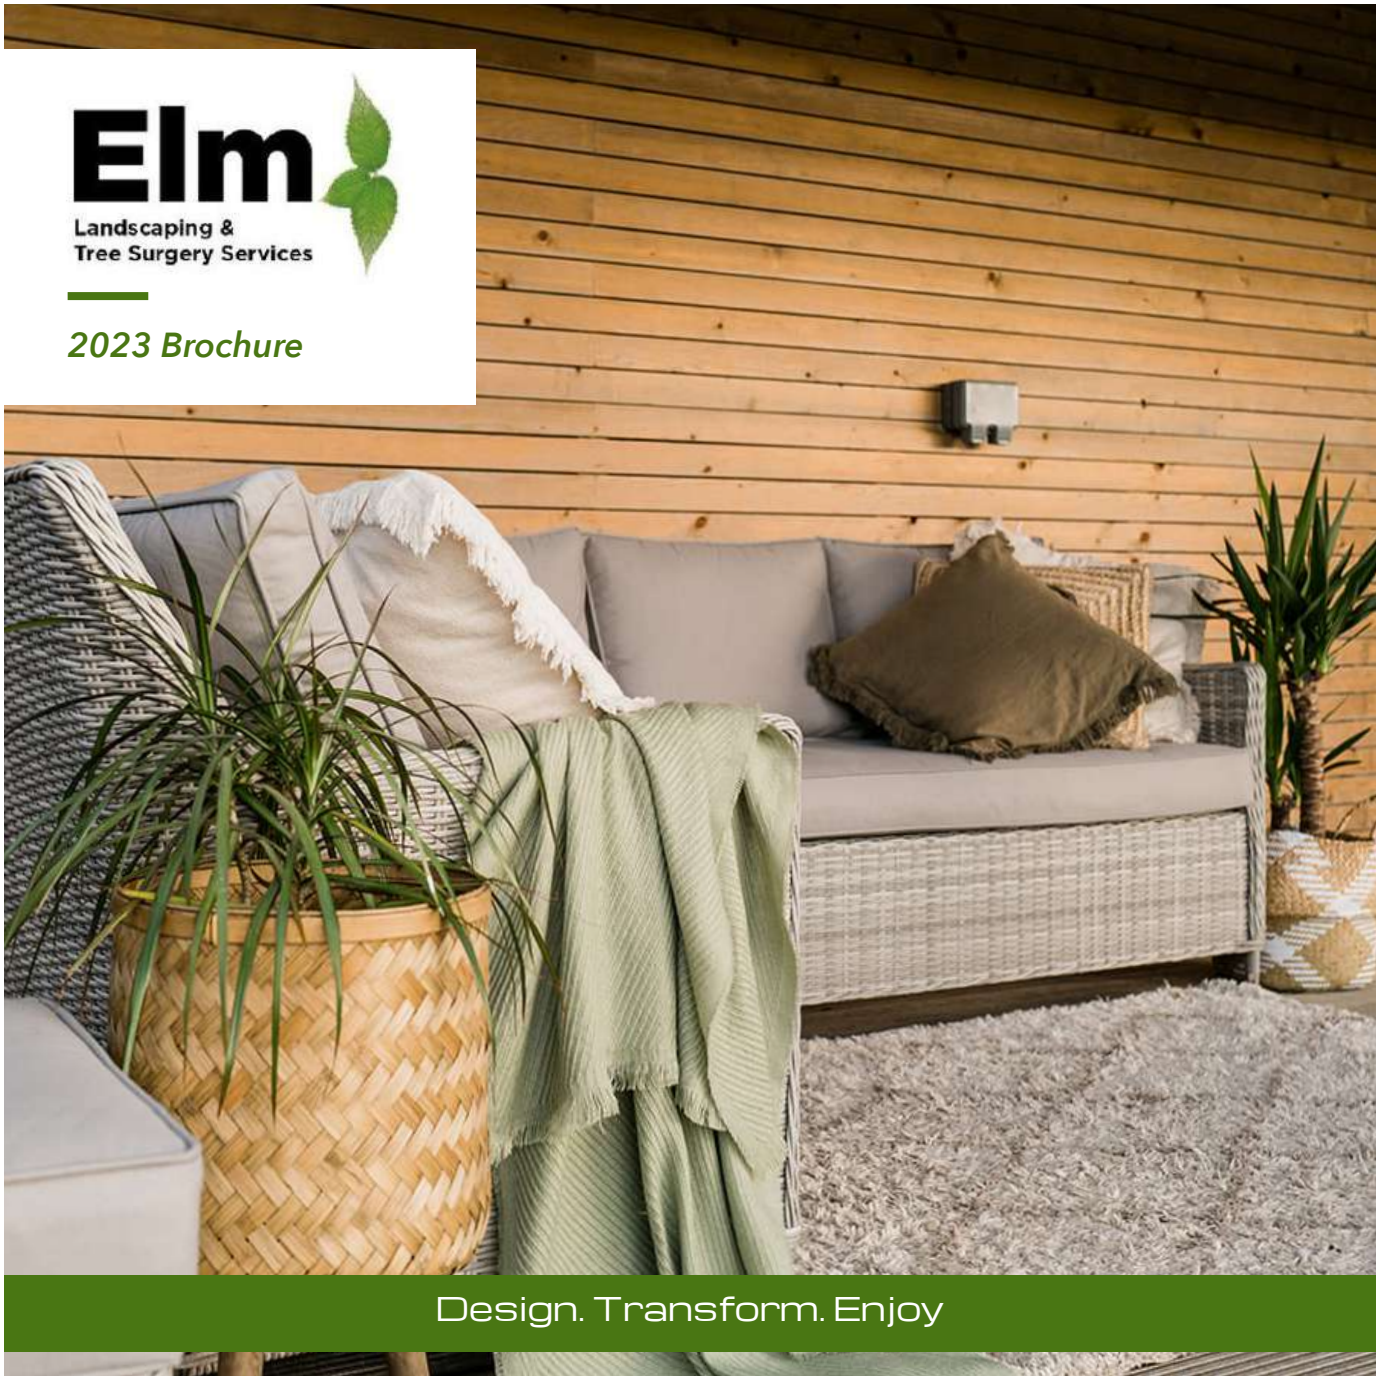
Landscaping &
Tree Surgery Services

2023 Brochure



Design. Transform. Enjoy

Introductory Page

Hello, nice to meet you!
Since its establishment in 2008 Elm Landscaping has grown to become one of Ireland's most trusted Landscaping companies. We have developed a highly skilled workforce with expertise in all aspects of outdoor design, construction, and maintenance. We combine this with industry leading machinery and excellent customer service to provide our clients with professional, reliable, and prompt service.

From the initial consultation right through to completion, we guarantee each customer a personalised and dedicated service which is focused on their specific needs and the distinctive nature of each project. We are also proud to use local Irish suppliers and materials whenever possible.

This brochure will detail the extensive skill set we offer, everything from hard and soft landscaping, groundworks, machine work, invasive weed management, site clearance, planting and tree surgery.

Do you want to revamp your garden or outdoor area? The possibilities are endless and the choice is all yours!

Garden Design Service

Whether you are starting from a green field site or are thinking about an existing garden makeover, we offer a comprehensive garden design and consultation service. We can offer advice on soft and hard landscaping options, planting solutions, garden refurbishments and upgrades, maintenance and remedial works including tree surgery, shaping, pruning and site clearance.

Ground Works / Site Clearance

Elm Landscaping and Tree Surgery Services offers a comprehensive site clearance service with specialist machinery which allows us to access and work in difficult terrain. We have invested in industry leading equipment to carry out all aspects of works required. From tree surgery, stump grinding and removal, wood chipping and invasive weed management to soil and subsoil stripping, stabilisation and topsoil supply we have the equipment, staff and expertise to clear and prepare any site ready for landscaping.

Hard & Soft Landscaping

Tree Planting & Hedging

We can look after all of your tree planting and hedging requirements, large and small. Whether you are looking to start a project from scratch or just add a handful of new additions, Elm Landscaping and Tree Surgery Services has you covered. We provide a whole spectrum of choice for your shrub beds or tree and hedge displays from bare root transplants and 2 litre pots to 6 metre plus high more mature tree specimens.

Regardless of whether your main priority is privacy or aesthetics, we will advise you on just the right combination of trees and hedges for your garden. Our services include boundary hedge and screen planting, avenue tree planting and full garden construction or refurbishment.

Lawn Seeding

At Elm Landscaping Services Ltd we have the experience, equipment, and capability to carry out lawn seeding works for gardens and properties both big and small. We also supply and lay turf grass for instant lawns.

Our specialized ground preparation and seeding machinery allows us to work both large and small areas with the ability to deal with all types of ground conditions whether your requirements are for grass seeding or lawn turf.

Artifical Grass

Artificial grass can be a great way to add an appealing and low maintenance green area to your outdoor space. It can be used in residential lawns, urban and commercial landscape design, leisure activities and playgrounds.

Artificial grass looks and feels just like well-maintained natural grass all year round even in the harshest of climates or under extreme footfall. It also removes many of the little drawbacks associated with natural grass – such as watering and the need to apply herbicides, pesticides, and fungicides.

Benefits of Artificial Grass:

- **Saves You Time & Money:**

Choosing artificial grass will greatly reduce the time and money spent on maintaining your garden. Mowing the lawn takes time, whereas artificial grass requires very little maintenance, can be easily cleaned and is environmentally friendly.

- **Gives A Natural Look All Year Round:**

Our quality product can withstand even severe weather conditions, so your garden will maintain its beauty throughout the year. It is manufactured from top quality fibers and has high UV protection.

- **Available In A Selection Of Shades:**

Our grass is available in 4 shades of premium quality green grass so you can choose the perfect option for your garden.

- **Withstands Wear & Tear:**

Very often, especially with children, you can end up with parts of the garden where constant usage will not allow grass to grow properly, and bald patches can turn to mud. None of this will be an issue with artificial grass.

- **Pet Friendly:**

It simply can't be dug up so muddy paws will no longer be an issue!

Patios & Paving

Nothing maximises the use of outside space like a patio. They can utterly transform your garden area, facilitating outside seating and barbecues in the summer months while improving the overall appeal and value of your property.

Elm Landscaping and Tree Surgery Services specialise in creating bespoke driveways, patios and walkways for domestic or commercial properties. Our drives and patios will be designed to fit perfectly with the age and style of your property and surrounding gardens.

Optional extras such as lighting, fire pits, sculptures, and water features can also be incorporated into the design.

For maximum aesthetic effect, patios are connected to the house, seamlessly merging the interior and exterior living areas. Other options include sunken or raised patio areas which can also be very appealing.

Bespoke Timber Decking

Outdoor decking is enduringly popular and we have a world of choice for you here at Elm Landscaping and Tree Surgery Services. Working with all forms of timber or composite materials, we construct beautiful and hard-wearing decks that will enhance your living space and give many years of pleasure and entertainment.

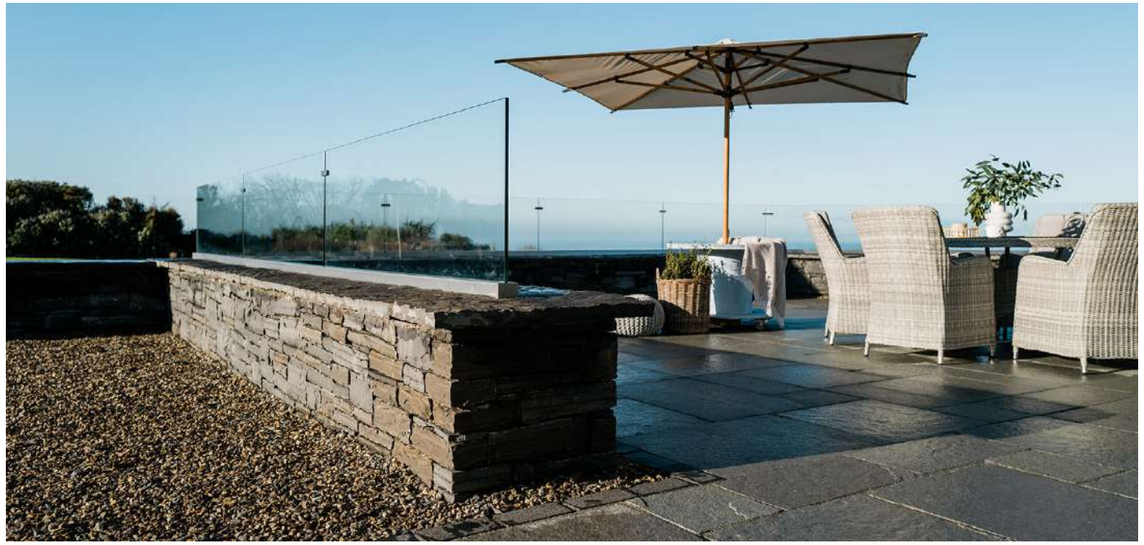
We will choose materials best suited to your unique setting, needs and budget to craft a decking area you will be proud of. We offer the traditional grooved softwood deck, hardwood timber decking including Ipe and Balau or composite timber decking, which comes in a range of different shades and is low maintenance and anti-slip.

The addition of lights and electrical points mean that your deck can be used all year round and wooden planters, seats and benches can also be worked into your deck design with wonderful effect.

Features:

Some of the timber decking features we offer include:

- Steps & Handrails
- Storage Units
- Timber Planters
- Lighting & Electrical Points
- Integrated Seats & Benches
- Ramps For Wheelchair Access
- Raised Or Multi-height Decking



Composite Decking

Elm Landscaping and Tree Surgery Services is an authorised installer of UPM ProFi Composite Decking.

What Is Composite Decking?

Composite Decking uses wood and cellulose fibres which are encapsulated in specially selected polymers to provide lasting protection from the weather. The advanced composite technology provides superior resistance to UV, frost, stains and impacts when compared to traditional or wooden decks.

Due to the innovative use of recycled materials, UPM ProFi has won several international awards, and its products make a major contribution to reducing traditional landfill and incineration. UPM ProFi deck boards are made from at least 50% recycled materials and backed by a comprehensive guarantee.

Why Choose Composite?

- Superior Stain Resistance
- High Impact Strength & Scratch Resistance
- High Friction In Wet & Dry Conditions
- Zero Degree Incline Possible
- Splinter Free & Warm To The Touch
- Recycled & Recyclable

Fencing

The right fencing will frame the full beauty of your garden to perfection and Elm Landscaping and Tree Surgery Services offer a comprehensive range of fencing products and installations in various finishes to suit your individual requirements. We use only pressure treated timbers and rustproof screw fixings in our timber fencing projects.

Our Range Of Custom-built Fencing Options Include The Following:

- Post & Panel fencing
- Post and Rail fencing
- Timber Wall Cladding
- Chainlink Fencing
- Trellis Screening

In preparation for your job, we can remove old walls, fences and hedges and dispose of them for you if required. All our garden fencing panels can be fitted using either timber posts or concrete posts and concrete base panels.

Driveways, Kerbing & Automated Gates

Construction of all types of driveways designed and installed, from reinforced geo grid and infill decorative pebble to tarmac. Here at Elm Landscaping and Tree Surgery we offer a full choice of kerbing also including granite, sandstone and limestone.

The perfect finish to your driveway design is the security of automated gates with the convenience of a remote/voice control open and close system.

Stonework & Brickwork

Beautiful stone and brickwork are the foundation of great garden design. The team at Elm Landscaping and Tree Surgery Services is highly qualified and experienced in the installation and maintenance of all stonework and brickwork relating to your landscaping project.

Whether your project will involve sleek polished lines or more intricate designs, we offer a full range of materials for you to choose from. With so many great options available, stone and brickwork can feature as heavily as you wish them to in your new outdoor space. Here, we list some of the many opportunities there are to showcase stone and brickwork in your new outdoor space.

Retaining Or Feature Walls:

Retaining walls are structures which hold (or retain) soil on one side, keeping it elevated or in a specific position. They are not only functional but can also make for a really striking landscaping feature. We have a wide selection of quality stone and brick available to help yours really make an impact.

Paving:

Choosing the right slabs for your footpath or paving can change the whole character of your garden space. You may wish to add some stepping-stones, a quirky staircase path or perhaps even pave the whole garden in a beautiful stone or brick for minimal maintenance.

Patios:

With more of us than ever choosing to entertain at home, the addition of a patio is sure to be a well utilised space for cooking, gathering and more. We can install your new patio in everything from classic granite and Indian sandstone or slate.

Decorative Stone:

Whether finishing off flower beds or surrounding a water feature, choosing the right decorative stone can add texture and colour to your outdoor space, complementing your overall design concept.

Garden Accessories:

From garden benches to fire pits, we have a full selection of quality stone garden accessories to help make your outdoor space uniquely yours.

Water Features

There are many elements to consider when planning your garden makeover. Choosing the perfect patio stone, decking shade and shrubbery can all have a huge impact on the finished result. Selecting the right water feature can also make a real statement in your new outdoor space.

Here at Elm Landscaping and Tree Surgery Services, we have access to a full range of stunning water features for your garden, which can be as simple or elaborate as you wish. Apart from the obvious aesthetic appeal, adding a water feature can also -

- **Promote A Sense Of Tranquility:**

Running water has long been proven to promote relaxation, boost energy and even alleviate stress. For these reasons, adding a water feature to your new garden could help to transform it into your very own outdoor retreat.

- **Help Mask Noise Pollution:**

Water features have the added advantage of helping to minimise the sound of passing traffic and other exterior factors and flowing and bubbling fountains and streams are particularly effective at absorbing unwanted noise. Water features can often be found in hotel lobbies for this reason.

- **Make It More Personal:**

Adding a decorative water feature to your outdoor space presents a real opportunity to showcase your personal taste. Whether you are a fan of sleek modern lines or more elaborate structures, your new water feature is guaranteed to become a real focal point in your garden.

- **Invite Wildlife:**

As a valuable water source, your new waterfall or pond could attract a variety of wildlife to your garden. This, in turn, will have wider benefits for the garden ecosystem and general vitality of your outdoor space, not least bringing all that lovely birdsong for you to enjoy.

- **Boost Property Value:**

This is perhaps an obvious one but is nonetheless worth mentioning. Enhancing the appearance and atmosphere of your outdoor living space with a water feature will certainly add to the overall appeal and value of your property.

Jacuzzis & Hot Tubs

Here at Elm Landscaping and Tree Surgery Services, we have access to an extensive range of in and above ground jacuzzi and hot tub models so you will be sure to find one which complements your outdoor living space.

Suitable for year-round use: Perhaps the main advantage of investing in a hot tub or jacuzzi is that it can be used all year long – yes, even here in Ireland! Though they can be cooling and refreshing in the summer months, there are few experiences more exhilarating than sitting in a steaming hot tub in the crisp winter air. Their small size means that they can be heated relatively easily and inexpensively. Just keep that towel handy for your quick dash back inside!

Health Benefits:

You won't have to step foot off your own property for a taste of the spa experience if you choose to invest in your own jacuzzi or hot tub. A warm, bubbling soak can help relax tense muscles, alleviate stress, and even improve sleep quality.

Regular soaks in a jacuzzi or hot tub have also been proven to help with the management of chronic pain such as arthritis and other inflammatory conditions as well as improving cardiovascular health. You may even choose to enhance the spa experience further by piping in some relaxing music (glass of fizz optional!).

Tree Surgery

Elm Landscaping Services Ltd offer professional tree surgery, tree care and arboriculture services nationwide.

Our Tree Care Services Include:

- Tree Felling & removal
- Tree Surveys, Inspections & Reports
- Crown Reductions, Target Pruning & Formative Pruning
- Consulting Arborist & Competent Legal Witness
- Windblown & Hazardous Tree Works
- Hedge Trimming, Shaping & Removal
- Countryside Management Services

All Your Tree Surgery & Tree Care Requirements In One Place

- Our tree care team can deal with everything from ornamental trees and hedges in your garden to fully grown mature trees on your boundary. We also carry out a stump grinding and wood chipping service with optional timber and green waste disposal offsite.

- At Elm Landscaping Services Ltd our certified arborist can provide tree surveys, reports and inspections acting as a competent legal witness if the need arises.

- As a follow on service, we can carry out tree, hedge and shrub supply and planting operations with plant material from Irish and European nurseries. We also specialise in orchard and fruit tree care. Our certified arborist can provide advice on woodland management, habitat management and consultancy, countryside management and environmental protection measures.

Domestic & Commercial Tree Surgery

Our team includes highly skilled operatives that specialise in the felling and removal of dead, dying or hazardous trees. Trees may need to be felled due to death, their location or if their structural integrity has been comprised. This can be achieved through clear felling or more often than not by section felling when operating in built up areas or confined spaces. This process involves the tree being climbed and taken down in sections in a safe and controlled manner.

We also carry out tree pruning, shaping, dead-wooding and crown lifting to remove dead, dying or obstructing branches which maintains tree health and sustainability.

Tree Care Consultancy

Our arborists are experts in diagnosing and treating problems to help sustain and protect your trees. In providing the basis for the proper maintenance and management of trees we can provide a comprehensive range of surveys, reports and management plans tailored to each specific site. Tree risk assessments can be carried out to minimize the risk of injury or damage caused by trees in your care.

Countryside Management Services

Ecological guidance and advice using wildlife friendly gardening and farming. Native woodland management including habitat creation and management.

Qualifications

All of our tree surgery staff are City & Guilds NPTC qualified as well as having Safe Pass and manual handling certification. We offer services to both the domestic and commercial sectors and our work is carried out to the highest standards using the most up to date arboricultural methods and equipment.

All Elm Landscaping Services Ltd staff are covered by €6.5 million public and €13 million employers liability insurance.

Stump Grinding

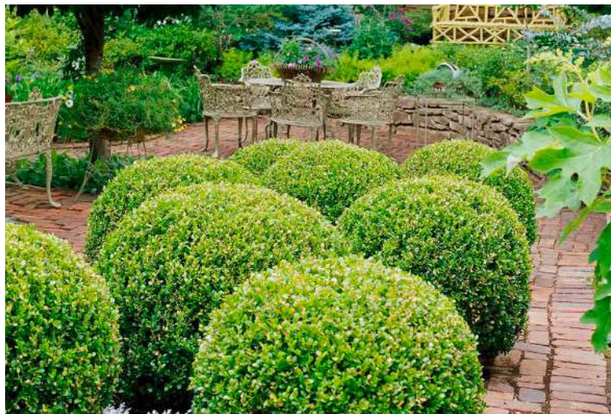
There are several different ways to remove a stump but the fastest, safest and most effective method is to grind it away. Elm Landscaping and Tree Surgery Services offers stump grinding operations with fully certified and trained staff. We also provide full tree surgery services.

We can remove your unwanted stumps quickly and cleanly and without resorting to digging. This process results in little or no disturbance to surrounding areas, minimising any reinstatement costs. We also look after the removal of overgrown or unwanted shrubs and hedging including the clean-up of areas with surface roots. We can also follow up with a comprehensive supply and plant service for new trees, hedging and shrubs or replacement topsoil, grass seeding or turf grass as required.

Invasive Weed Management

Is invasive weed growth posing a problem in your garden or commercial space? Elm Landscaping and Tree Surgery Services specialises in invasive weed management including the control and removal of Japanese Knotweed, Himalayan Balsam, Giant Hogweed, Ragworth, Buddleia davidii and Marestail.

Depending on the circumstances and growth rate, we can control, eradicate, dispose of or monitor various invasive weeds on amenity, industrial, commercial and residential sites.



Garden Maintenance

The experienced team at Elm Landscaping and Tree Surgery Services will look after every aspect of your garden maintenance as required. The services we offer include grass cutting, tree care, shrub bed maintenance and weed control.

We also specialize in vegetation clearance and site remediation works and welcome enquires from owner managed estates and resident's associations.

Our garden maintenance teams are trained in machinery and equipment use, safe pass, manual handling & chemical application and have also received industry specific health and safety training.

Commercial Grounds Maintenance

Elm Landscaping and Tree Surgery Services provides a full range of commercial grounds maintenance solutions including grass cutting, shrub bed maintenance, tree surgery, remediation works and invasive weed management operations.
